

karen kuzmiak

designer | developer | creative

who i am

I am a UI designer who crosses over to UX and product arena as well. My talents include deciphering puzzles, organizing tons of information, and seeing the big picture while noticing the small details. My 50/50 brain loves to integrate technology with art in order to create a user experiences that transcends the 'usual.'

Languages fascinate me, I know 10 - fluent in two. I have always wanted to learn the piano. As a kid I wanted to be an animator.
