# web developer | designer | creative

## experience

**ETi Employee Training Institute, 2019-present**
*Web Developer / Graphic Designer*

Designed and coded responsive website that plays well across multiple platforms.

Highlights:
- Reduced website content for site from over 100 pages to 4 plus course pages, leading to a more efficient interface
- Increased accessibility compliance score from 75% to 92%.

Current work includes:
- Maintain website and applications, including content updates, account administration, debugging, testing, and regular upgrades to ensure web security and system usability
- Continual optimization of visual and coding elements to improve loading speed and performance
- Updating to reusable code that minimizes the time needed to complete projects/updates in the future

**BeatBabel, 2018-2020**
*Quality Assurance Specialist / Linguist*

Provided localization quality assurance for websites, technical manuals and instruction sheets utilizing meticulous editing, grammar, and translating skills. Specializing in Italian.

Highlights:
- Verified linguistic accuracy and checked for typographical, grammatical and punctuation errors in several languages.
- File Maintenance:
  - Ensured that quality, accuracy and consistency is maintained throughout files.
  - Created and maintained terminology and translation memory databases.

## projects

**The Kuzi Collaborative, portfolio** (in process)
- Utilized WordPress as well as hand-coding in order to broaden exposure to multiple methods to develop websites
- Created unique layout and design

**Food Order App**
Designed and developed a utilizable pizza ordering app including form fields, drop downs, and regex validations.

**Database App**
Designed and developed a utilizable comic book database app that allows user to save and view important information about the user's collection. Created login and sign up, constructed local storage and set up a development environment for cross-platform apps.
